Executive Summary

Data Scientist / AI Engineer with hands-on experience in machine learning, computer vision, NLP, data analysis, and automation. Proven ability to build end-to-end solutions from data collection and model development to deployment using Python, SQL, Flask, Streamlit, Power BI, and cloud tools.

EDUCATION

B.E. (Computer Systems Engineering)

M.U.E.T, Jamshoro, Pakistan | Dec 2022 – Dec 2026

- Specialization: Data Science, AI, ML
- Relevant Coursework: DSA, OOP,

PROFESSIONAL EXPERIENCE

Freelancer

Fiverr | 12/2024 – Ongoing

- Delivered Data Science, AI, and ML solutions with a 5/5 client rating across all work.

AI / Data Engineer

DEVCORE | 2024 – Present

- Built **LLM-based financial AI (Berkana AI)** with NLP (FinBERT, SpaCy), forecasting (LSTM/XGBoost), and scalable microservices.
- Developed **biomedical ML platform (Bipop)** with 148+ models enabling **forward & reverse prediction** and optimization for personalized therapy; deployed via Flask.
- Designed **serverless AWS ETL pipeline (S3, Glue, Athena)** with Power BI dashboards and Airflow automation.

Junior Data Analyst

PentabyteX, Lincolnwood, USA | 09/2024 – 09/2025

- Developed a scalable Google Maps **scraping pipeline in Playwright** with parallel extraction, retry logic, and automated export; deployed via **Azure virtual machine**.
- Cleaned and analyzed large datasets to extract insights and identify recurring patterns.
- Used Slack and Jira to support smooth collaboration, task tracking, and delivery.

AI Intern

SAINCUBE., Hyderabad, Pakistan | 05/2024 – 07/2024

- Built a real-time activity detection system using OpenCV, MediaPipe, MobileNet-SSD, and a Tkinter desktop interface for employee work hour calculation.
- Built an end-to-end face recognition attendance system using Flask, OpenCV, and Firebase for automated employee check-in/out.
- Annotated various datasets for **YOLO** model training using **Roboflow**.
- Contributed to a Django-based web platform with real-time chat, user management, and workflow automation.

IT Intern

L.U.M.H.S., Jamshoro, Pakistan | 05/2023 – 06/2023

- Developed and optimized web interfaces using HTML, CSS, and JavaScript.
- Performed data preprocessing, EDA, and statistical analysis using Python (pandas, NumPy).

TECHNICALS SKILLS

Python | OpenCV | YOLO | MediaPipe | Dash (Plotly) | Data Annotation | Folium | LangChain | RAG | Flask | Django | Streamlit | WordPress | HTML | CSS | JavaScript | MySQL | PostgreSQL | Firebase | Docker | Git | GitHub | AWS EC2 | AWS S3 | AWS IAM | Azure VM | Power BI | Powe Apps
